Part III Other Accessories

Circuit breaker mechanical characteristic monitoring module

With high-precision sensors and data collection technology, the module monitors the operation of switchgear in real time and sends alerts when abnormal situations occur.

Mechanical characteristic component

Electric switch cart control module

The controller uses a high-performance 32-bit processor, which can quickly detect abnormal conditions, brake the motor and sends alarm signals. With soft start, the module allows easy switch between manual and electric operation. The control module can operate on both strong and weak current inputs to achieve electrical interlocking/control.

Electric chassis cart accessories

Circuit breaker online temperature module

With the latest-generation of passive RFID wireless technology, the module is highly reliable and accurate. It is also small in size, easy to install, adaptable to various applications.
